BATTERY WARRANTY COVERAGE GUIDELINES
GUIDE DE GARANTIE DE BATTERIE

EFFECTIVE: January 1, 1986

PRO-Rata Adjustment Allowance Formula
BATTERIES ELIGIBLE FOR PRO-RATA ADJUSTMENT ALLOWANCES

TYPE	COLD CRANKING RATING AMPS	PRO-RATA ADJUSTMENT PERIOD (MONTHS)
Original Equipment	All	36
Service Replacement	300-399	36
	400-449	48

Application
ApplicationPart No.
No. de Pièce**HOW TO COMPUTE PAYMENTS FOR OEM AND ALL SERVICE
REPLACEMENT BATTERY PRO-RATA ALLOWANCES**

The amount the owner pays for the new battery under the pro-rata adjustment allowance is calculated as follows:

NEW BATTERY SUGGESTED LIST PRICE	÷	NUMBER OF MONTHS IN PRO RATA ADJUSTMENT PERIOD	X	NUMBER OF MONTHS BATTERY HAS BEEN IN SERVICE	=	AMOUNT OWNER PAYS FOR NEW BATTERY
--	---	--	---	--	---	---

The amount the dealer pays for the new battery under the pro-rata adjustment allowance is calculated as follows:

NEW BATTERY DEALER NET PRICE	÷	NUMBER OF MONTHS IN PRO RATA ADJUSTMENT PERIOD	X	NUMBER OF MONTHS BATTERY HAS BEEN IN SERVICE	=	AMOUNT DEALER PAYS FOR NEW BATTERY
------------------------------------	---	--	---	--	---	--

EXAMPLE: A service replacement battery with a 400 AMP cold-cranking rating fails at 16 months with a Suggested List Price of \$60 and a Dealer Net Price of \$45.

- $(\$60) \div (48 \text{ months}) \times (16 \text{ months}) = \20 OWNER PAYS
- $(\$45) \div (48 \text{ months}) \times (16 \text{ months}) = \15 DEALER PAYS
- Suggested List Price and Dealer Net Price can be found in the Parts and Accessories Price List catalog.
- When calculating the number of months a battery has been in service, the date of purchase should be the first day of the month following the month of actual purchase.
- Defective batteries replaced during the warranty period must be replaced with American Motors approved batteries only.
- For complete Battery Warranty details refer to your AMC/Jeep or Renault Warranty Administration Manual.

OTHER MAKE VEHICLES

NOTE: For a complete Cruise Command installation, order the Base Kit, plus a Turn Signal Lever and a Speed Sensor. For Diesel Engines also order 89 83 503 624.

NOTE 1: Use Adapter 89 83 503 622 for 83/86 Toyota Carb, Pick-up Trucks and Camry.

NOTE 2: Use 89 83 503 620 Throttle Adapter for 2.5 Liter "N" car engines.

NOTE 3: Use Adapter 89 83 503 624 on vehicles with Distributorless Ignition (i.e.: 3.0L V-6 Engines in 86 LeSabre, 86 Skylark and 85/86 Somerset).

NOTE 4: Use 89 83 504 331 for Chevrolet Sprint, Spectrum, Nova, Chevette and Pontiac T1000.

NOTE 5: Some 85/87 Front Wheel Drive vehicles will require 89 83 503 615 as Chrysler used 2 types of Speedometer Cables. Visual inspection will be required to determine which Speed Sensor is to be used.

WE NEED YOUR HELP!

Our goal is to give you the biggest variety possible of genuine accessories and then to help you promote and sell them. We need your help in pointing out any areas that you feel need particular attention in achieving this goal.

Take a few moments to answer the three questions and send the card in... no stamp is needed. Thanks.

1 Are there any new accessories you would like to see introduced?

2 What would you like to see from us to help you sell more accessories?
